In **Section 6**, the Restriction Requirement indicates that if the claims of Group I are elected for examination, a single species selected from the following:

- (1) polynucleotides only (claims 2 to 8, 11, 12, 15 to 21, 24, 25, and 32);
- (2) functional property assay (claims 9, 10, 22, and 23); and
- (3) adding clamp (claims 13 and 26),

is required to be elected for examination. Applicants elect the species of polynucleotides only, as recited in claims 2 to 8, 11, 12, 15 to 21, 24, 25, and 32 for examination. As requested in the Restriction Requirement, it is submitted that the elected species are readable on claims 1 and 14.

Applicants respectfully note that **Section 5** appears to be a duplicate and erroneous section directed to the election of species. Applicants have responded to the requirements as laid out in the alternate **Section 6**.
